Quality Engineering, Nuvasive, Inc.

CALLING ALL ENGINEERS!

Have you had an unplanned change in employment?

Is your current job not meeting your needs?

Have your career goals and interests changed?

Are you switching from academia to industry?

If you answered yes to any of these, then you're currently going through a career transition—and it's crucial that you tap into all possible resources to make the most of your opportunities.

"Career Transitions in Engineering: Insights from the Field," presented by UC San Diego Extension, is designed to help engineering professionals and students going through a career transition. We'll feature two panel presentations designed to help you with your transition.

Panel 1

Employers will discuss the skills and experience you'll need to successfully search for your new opportunity.

Panel 2

Industry experts will share insights, trends and lessons learned from their own career transitions.
